

EDUCATION

University of Illinois Urbana-Champaign (UIUC)	Expected: December 2025
Master of Computer Science	
• Courses Taken: Deep Learning For Computer Vision, Advanced Distributed Computing, Computer Security, Cloud Networking	
Arizona State University (ASU)	August 2020 – May 2024
Bachelor of Science in Computer Science	4.00 GPA
• Courses Taken: Data Structures & Algorithms, Distributed Systems, Operating Systems, Software Design Principles, Computer Networks	

WORK EXPERIENCE

Software Engineer Intern	May 2025 – Current
PayPal Inc.	Scottsdale, AZ
• Engineering Spring Batch pipeline to automate reconciliation of over 6.5M+ failed financial events, reducing manual SQL fixes.	
• Implementing event requeue logic based on lifecycle state transitions and timestamps to ensure correctness and idempotency at scale.	
• Troubleshooting QA failures using distributed log analysis and event state inspection; validating batch behavior across systems.	
• Writing unit and integrated tests using JUnit , Mockito , and WireMock for end-to-end validation; building observability dashboards.	
Cloud/DevOps Engineer	January 2025 – April 2025
Nexus	Remote, USA
• Defined AWS architecture for multi-user coding platform, enabling CI/CD, ECS scaling , and region-based production readiness.	
• Reduced deployment time by 90% with 3 GitHub → CodeBuild CI/CD pipelines for frontend, backend, and infrastructure.	
• Refactored EC2-based stack to serverless AWS (ECS , EFS , S3 , Route53 , DynamoDB) with CDK, reducing infra overhead by 30%.	
• Delivered production-ready deployment in 6 weeks by aligning infra roadmap with dev workflows and cross-team priorities.	
Software Development Engineer Intern	May 2023 – August 2023
Amazon.com	San Diego, CA
• Built automated orchestration with Lambda , SQS , Java & TypeScript to back-fill a million records, saving developer time by 99%.	
• Architected 1-click reusable cloud stack using AWS:CDK to perform batching for downstream services with rate-limited TPS.	
• Constructed robust error handling mechanism with automated retries for transient errors reducing failure, ensuring 100% data integrity.	
• Tested system end-to-end using JUnit5 achieving 100% code coverage. Deployed real-time monitoring dashboard using CloudWatch .	

PROJECTS

PitchPal ML Engineer PyTorch, Torchvision, OpenCV, CNN, MediaPipe	
• Designed and implemented an AI-powered multimodal analysis system that evaluates elevator pitches using speech and facial cues.	
• Built a nervousness classification model using EfficientNet-B0 trained on custom-labeled facial expressions, achieving 80% accuracy .	
• Integrated eye contact detection using a pre-trained CNN-based facial gaze tracker, to enhance nervousness classification.	
• Developed a fully automated local inference pipeline for video analysis with PyTorch , OpenCV , dlib , and MediaPipe .	
360Torrent Distributed Systems Engineer Python (asyncio), Ansible, tmux, P2P Systems, BitTorrent	
• Developed a Python-based P2P CDN for 360° video, reducing download latency by 42% via geo-aware chunk prioritization.	
• Designed churn-resilient downloader using asyncio , adaptive health checks, and rarest-first strategy; improved reliability by 35%.	
• Deployed system on 20 VMs using tmux , tc , and Ansible , simulating 100+ clients with region-aware network conditions.	
• Integrated popularity matrix at tracker; pre-seeded hot chunks across peers, cutting startup latency by 28%.	
Banking Easy Network Engineer Java, Network Programming, Sockets, TCP/IP	GitHub
• Implemented P2P banking application in Java (Sockets) leveraging network programming to perform parallel processing transactions.	
• Created a shared customer cohort with a bank to perform 100+ transactions and update the system state in real-time.	
• Reduced error rates by 30% by deploying advanced checkpoint and rollback algorithms, managing transaction conflicts, data corruption, and network failures.	

SKILLS

Languages:	Python, Java, C/C++, TypeScript, JavaScript
ML & Research:	PyTorch, Torchvision, OpenCV, CNN, MediaPipe, CoreML
Infrastructure & Tools:	Git, JUnit, Ansible, tmux, Linux, XML, JSON, MySQL, JDBC
Cloud & Systems:	AWS {CDK, Lambda, SQS, S3, RDS, EC2, ECS, EFS, API-Gateway, CloudWatch}
